

Assignment

Q2) Why are ISO 14001 is generic standard?

ANS) ISO 14001 was developed to provide a management system to help organisations reduce their environmental impact. The standard provides the framework for organisations to demonstrate their commitment to the environment by:

- Reducing harmful effects on the environment
- Providing evidence of continual improvement of Environmental Management
- Meeting environmental legal requirements

The standard is generic and does not apply to any particular industry or business sector. It provides a strategic framework that can be used to meet internal and external objectives for Environmental Management

By achieving ISO14001 certification you will be able to clearly demonstrate your commitment to reducing waste and recycling materials where appropriate. The benefits to your organisation will not just be in cost savings, they may also prove beneficial when tendering for new business.

Other benefits include improved efficiency, employee engagement and mitigating the risk of fines and prosecutions.

Q3) what are the question to asked in environment management programs?

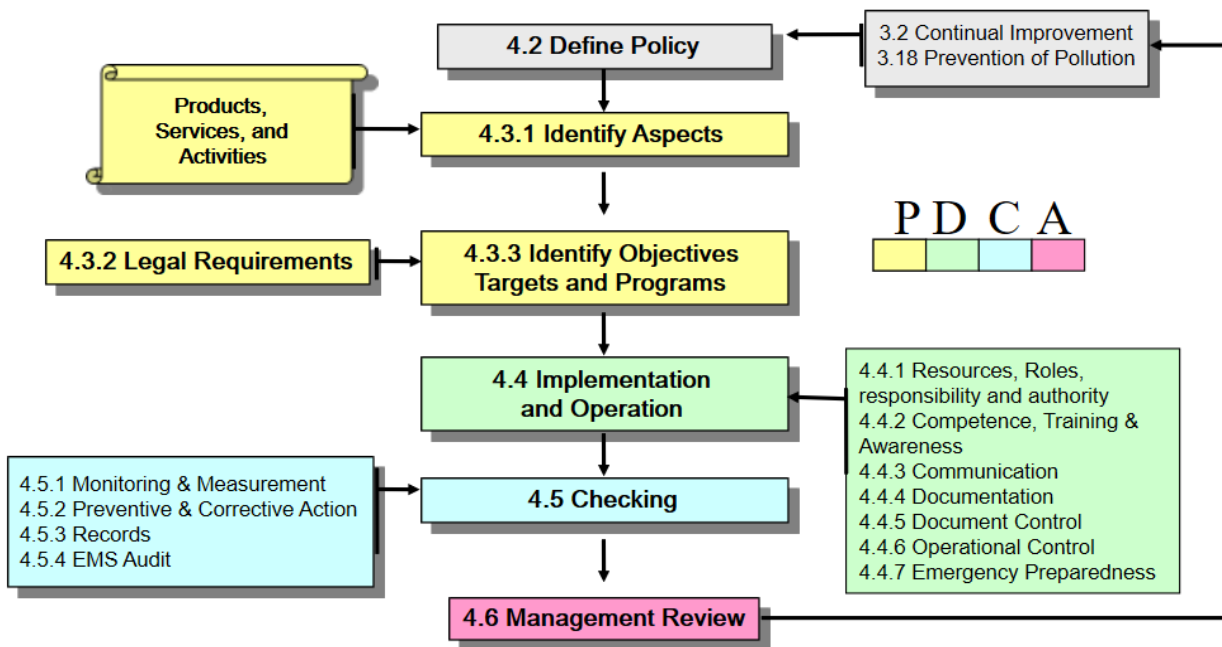

ANS)

- How objectives and targets will be accomplished?
- Who is responsible for achieving them?
- Who will manage and super the activities?
- Who will carry out the work?
- What they will do?
- What resources are needed?
- When the task will be completed?

Q5) Draw the block diagram for any two stages of EMS

ANS)

The ISO 14001 EMS Model
